

The Manatee Card

Hi my name is Jane, I am the Auxiliary Services Director for our school, my team is responsible for the Manatee App (used to be the Manatee Card). So, no one is going to say that a Manatee is a huge threat or an intimidating animal, but at our school Maurice the Manatee is our school mascot, so we love them. We have Manatees on everything, we even have the Manatee Card, or we used to, now it's the Manatee App.

The card gave us access to buildings, access to meal plans and spending/payment plans, it was our student ID too.

Now we don't have to deal with 2 pieces of plastic. We don't have to manage a line of students all day who have lost their Manatee card. We don't have to spend all summer printing new cards for new students.

As the Auxiliary Services Director it's my job to manage The Manatee Card.

THE MANATEE CARD

THE MANATEE APP

Here is why we moved to the Manatee App.

1. Students wanted an app, they always have their phones so it's much easier.
2. Students were tired of losing and having to replace the card, it cost us a lot to replace them as well.
3. We were able to automate and integrate our SIS with IDentifyED, so taking the student data and putting it on IDentifyED was a breeze and we have it set-up so any changes on the SIS automatically update IDentifyED.
4. We were able to create workflows and automation that allows us to deploy the card information to our physical access controllers and our payment systems.
5. IDentifyED is able to automatically and transparently download a standard HID SEOS smart credential onto the students' phone easily, so no more issues with deployment.
6. IDentifyED creates a campus ID completely integrated with our IT system, so no more printing new cards for weeks.
7. IDentifyED also provides amazing user engagement tools like:
 - Integrated and easy admin, custom campus app with no programming and super easy updates.

- User Communication Portfolios
- Messaging Inbox/Outbox
- School Broadcast
- Group/Course Message Board
- Group Messages
- Course Messages
- User to User Chat
- Location Sharing
- File Sharing
- Picture Sharing
- Calendar Sharing
- Group Chat
- Grades
- Attendance
- Assignments
- To-dos
- Take-home
- Courses
- Groups
- Volunteers
- Disclosures
- Calendars

8. For Campus security IDentifyED provides:

- Campus ID
- Custom App
- Location
- HID SEOS Software-based Smart Card
- Help Requests
- Emergency Broadcast
- Check-in
- Content Tool
- Reunification
- Bus
- Carline
- Check-Out
- Hall Pass
- Discipline
- Say Something

Here is how your integration that you could have:
